

Construction 3.0™ Management Programs

Powerful strategies to immediately impact performance

Ted Garrison, CSP, is a nationally-acclaimed construction industry visionary known for his high-energy, highly informative presentations that give audiences maximum take-away value. His Construction 3.0™ Strategies offer a new future for the industry.

A civil engineer with 25 years management experience constructing 10M SF of commercial buildings, he has been a consultant, author and speaker on construction management topics since 1998.

He is **author of *Strategic Planning for Contractors*** & co-author of five books on marketing, customer service and leadership.

As **host of the internet radio program, *New Construction Strategies*** (www.NCS30.com) he conducts weekly interviews with leading industry, business & government experts.

He averages over **50 presentations a year** to national and international construction audiences and private companies.

*Program available in
90 minute, 4 hour
or 8 hour formats.*

Risk Management: Eliminate the Hidden Traps to Project Success

This program is for you if you are

- fearful of a large financial hit because of unanticipated project problems.
- faced with confrontational issues or even litigation because of the consequences of some unresolved problems.
- frustrated because too much of your time is spent on problems.

The primary responsibility of the project manager in Construction 3.0™ Risk Management is minimizing project risk for the client, the designers, the subcontractors and the prime contractor. Unfortunately too many of today's current industry practices actually increase project risk or threaten a company's long-term stability. Construction 3.0™ Risk Management exposes today's dangerous practices and reveals methodologies that reduce risk for all parties, thus creating a win-win situation. Reducing project risk is essential for maintaining both a healthy company and a healthy industry. Construction 3.0™ shows managers and executives from contractors, designers and owners how to work together to minimize project risk.

Key takeaway points include the following:

- Identify potential risk with a weekly risk assessment report
- Minimize risk by developing a project-wide approach to risk management
- Assign risk to the entity best able to manage the risk
- Deal with unresolved unknowns with an effective contingency plan

Ted completely changed my way of thinking about the industry, relationships, and managing projects."

— Jake Steele, Project Mgr., Russell Construction
